

## QC3 COMPATIBLE PREMIUM LED USB PUCK

### REF. 028-SNC-USB-PUCK-4WQC3

---

#### Premium Modular LED USB puck

Premium Single USB 4 Wire Puck for mounting remotely from the base. Comes with 3 foot modular cable or 6 foot for one dollar more.

Allows all cell phones, smart phones and tablets that use a Type A Male USB at the charging end, to plug into this device.

All the latest cell phone and tablet charging cables have a male Type A USB plug that can fit into this puck.

Pucks are mounted under a table where the customer/poker player sits.

The Premium 4 Wire Pucks feature:

- QC3 Compatible
- Aviation connectors, so they won't pull apart
- They have LED lit ports, so they promote themselves, and make it easier for your customers to see and use the new service you provide.
- Will charge some phones in Fast Charge mode.
- Modular pucks and separate cables. This makes it easy to service. You can easily replace or change just the puck.
- They eliminate the liability you would have from putting 110v outlets accessible by customers as they drink at your bar. You only expose your customers to a harmless 5v/9v (same as a flashlight).

# QC3 COMPATIBLE PREMIUM LED USB PUCK

## REF. 028-SNC-USB-PUCK-4WQC3
